Etudes Transcendantales was commissioned by the French Ministry of Culture. The work forms part of Ferneyhough's *Carceri d'Invenzione* cycle. The first complete performance of *Etudes Transcendantales* was given at the Venice Biennale on 30th September 1985 by Harrie Starreveld (fl), Vincent Rombout (ob), Brenda Mitchell (sop), Martin Derungs (hpsd), Taco Kooistra (vc) and Ed Spanjaard (cond).

When this work is performed as part of the full *Carceri d'Invenzione* cycle (see p. 63), the title should be given as *Etudes Transcendantales/Intermedio II*.

The score is a facsimile reproduction of the composer's manuscript

Duration: ca. 27 minutes

THE TEXTS: POEMS BY ERNST MEISTER AND ALRUN MOLL

Etüden (Auszug)	Komet	Kartusche	Elysium
1. Nacht, wo der Diamantberg glänzt und Rabe und Nachtigall zur Schaukel machen den werdenden Mond.	3. ich lote die stürzende Tiefe in den gefesselten Sprung	4. in Gold gefaßt die Lapisnacht am Kratermund der Skarabäen	5. im Aufwind leuchten die Fesseln
2. Diese langen Regenfäden enden nicht in deiner Hand.	zur Dunkelhaft verglühten basaltgefederte Schwingen	fossile Glut ritz ihre Schwerkraft in die Sonnenzeichen	lichtgestrandet treiben die Flügel
Wo das Kreuz ist der Sanduhr, wurzelt der Blitz	kaltgeschlagen ufert die Ebbe	[zielsuchtige] ¹	Fadenkreuze fanden Gewißheit
Die Sorge: als Wind bespringt sie den Rand erblickter See, verdingt sich, als Segel dem Grunde.	(A.M.)	die Feuerprobe im Wendekreis des Nichts	jenseits der Blendung
Woran gebrichts? Kind sagt dirs nicht noch Vogel		mein Schläfenbrand will euch die Sohle wetzen	Duftschwere noch in seligen Gefilden
Zeit zielsüchtig sonst, spricht plötzlich dir von Raum.		Inbrunst verseigeln am Flügelblei der Silbe	<i>Bernstein-Insekteneinschluß</i>
Mit schönen Knien kommt Vernunft vorbei		Mohnstaub hinfällig ausgespien	(A.M.)
	(E.M.)	verwurzelt eure Blitze	
		<i>Skarabäen</i>	(A.M.)

Der Grund kann nicht reden

6. Der schreibt kein Tagebuch,
Grund, der aus Totem und Toten
steht,
der die Säulen aus Wasser trägt
und die immer
geschlagene Flotte der Worte . . .

Er, behäuft mit Verrott und Dunkel,
kehllos Ohnsilbiger unter
rudernden Flossen, fahrenden
Kielen!

Stoß ich hinab?
Ich griffe im Finstern wohl
wie faulen Zunder
phönizischen Kindes Gewand,
gelöstes Lotblei,
irrendes Echo, das
Wrack einer Laute . . .

Tauche ich?
Ich suchte mit Lampen, ich fände
ein Logbuch, welches jedoch
von des Totseins Bewandnis
nicht spricht, sondern allein
von des Unterganges Beginn:
WIR SINKEN. WIR
WERDEN GRUND.

(E.M.)

Kalypso

7. Sirenenschliff

Steinschlag
verzückt
die rächenden Zikaden
eintönig
fiebergetrieben
Aufruhr
im Brennglas der Flügel

Windrisse über den Dünen

schrill
meißeln die Peitschenhiebe
Stimmbruch
in gläserne Schwingen
sprunghaft
erlischt
das Begehren
verödet
bleichen die Segel

Medusen treiben an Land

Insel der Kykladen

(A.M.)

Pythia

8. **B**¹ du reimst die dunkle Saat vergebens 9. entflügelt
treiben meine Ruder
steil
ruht der Abgrund
bleicher Spiegel
mit fahler Iris
sank die Flut

im Widerschein
Hochzeit
der wildernden Kristalle
das Irrlicht blaut
mondsteinstrückt
ein Gletscherbrand
in atemloser Halle

INSTRUMENTATION

Flute (piccolo, alto flute)
Oboe (cor anglais)
Soprano *e-b* " (claves)
Harpsichord (two manuals, 8', 4' and lute registers)
Violoncello

PERFORMANCE NOTES

Metre

Unconventional metres (2/10, 6/12, 9/24 etc.) are preponderant in this work. The principle by which conventional metres are derived (as subdivisions of the semibreve) may be applied in every case. For example, 2/10 signifies a bar composed of two beats, each of which is equal to one tenth of a semibreve. All such 'irrational' metres in this work stand in either triplet or quintuplet relationship to the basic metre, and are thus proportionately faster than the latter ($1/10 = 1/8 \times 0.8$). The new beat may be found by working out what proportion of the previous beat should be subtracted. While the overall tempo of the work may to some extent be regarded as a matter of choice, relationships between the tempi within must be strictly observed, and metre changes are to be interpreted precisely. Metronome markings always apply to normal quaver values, even when the first bar to which they apply has an 'irrational' metre.

Microtones

Two different notations for microtones are used in this work; the first for tempered microtones, which should normally be produced using special fingerings, and the second for 'inflectional' microtones (used mostly in Song 5):

The arrow-head attached to each inflectional accidental indicates the direction of deviation. In woodwind parts, microtonal inflections may usually be made by adjustment of the embouchure. Special fingerings should be used however in Song 5.

Flute

+ Key-click (choose fingering which produces most resonance). Normally used in conjunction with more conventional tone-production

⌞ Lip-pizzicato, with no breath-sound following attack

 Rapid double or triple tonguing on same pitch, as fast as possible

Ⓣ Exaggerated tongue-attack

Ⓛ Attack without tongue

◊ Breathy sound (pitch audible)

◊ Breathy sound (pitch scarcely audible)

Flute and Oboe

 Glissando. The small note in brackets indicates the pitch to be arrived at at the end of the notated duration. Do not re-attack

 In double and triple trills, the trill notes in brackets should alternate irregularly around the main note, creating the effect of a cloud of pitches from which the main note emerges as the most prominent. Always play these trills as fast as possible, making sure that no repetitive patterns are audible

Trill between normal and harmonic fingerings

Play the first grace-note exactly where the main (bracketed) note would appear to begin. Move from the last grace-note onto the main note *legato*, as if the main note were continuing from a previous attack

Oboe

Change fingerings while remaining on same pitch. ① always indicates traditional fingering, while higher numbers indicate fingerings giving timbres increasingly distant from those produced by ① in respect of pitch, diffuseness of tone, and dynamic level

Exaggerated explosive attack ('tongue-slap')

Irregular glissando with slight accents produced from the diaphragm, with no interruption of air-flow. *Quasi smorzato*

Exaggerated vibrato, almost a (narrow) wavy glissando, rapid and irregular

Mordent; always to the nearest microtone unless otherwise indicated

Inverted mordent; always to the nearest microtone unless otherwise indicated

Multiphonic. Choose any three multiphonics that speak easily, and play them in the order indicated

Violoncello

Glissando. The small note in brackets indicates the pitch to be reached at the end of the notated duration. Do not re-attack

Natural harmonics are notated at sounding pitch, except where more detailed indications are necessary

'Half-harmonic' fingering: pressure of finger on string should be halfway between harmonic and normal fingering. Tone-production will be unstable and diffuse

Gettato. The rapidity of the rebounding action is indicated graphically, but the exact number of rebounds need not be observed precisely

Finger percussion. Strike string sharply with fingertip in the position indicated

Exaggerated vibrato, almost a (narrow) wavy glissando, rapid and irregular

Grace-notes: see remarks for Flute and Oboe

Harpsichord

Mordent. The small number indicates the interval between the main note and the upper note. A small '9' represents a major ninth, and a small '7', a major seventh. The same principle applies to inverted mordents

Grace-notes: see remarks for Flute and Oboe

Dynamic markings indicate not only amplitude but also appropriate articulation; thus occasionally the dynamics change even though no keyboard modification has been marked. The 4' register should not be used unless specifically indicated

Voice

Each syllable is followed by a dotted line unless it is the last syllable of a word, in which case it is followed by a solid line. Dotted lines (even over rests) represent word continuity: the words are to be 'thought through'

Transition from one sound to another

Clearly rolled Italian 'r', akin in effect to fluttersong

Glottal stop; the following sound begun by an explosive release of air in the larynx

In Song 8 an extra system (one line) has been added beneath the staff in some places, to indicate explosive consonant sounds. These sounds should normally be very short, and cut off abruptly with glottal action as if under high pressure. Black noteheads indicate slightly-voiced sounds; white noteheads indicate unvoiced consonants

The letters A and B represent two structurally distinct texts and types of texture which alternate throughout the movement. The voice should aim to move from one to the other with as little sense of transition as possible, giving the impression of a 'schizophrenic' division of function. In sections marked A, the dynamic *pppp* indicates that the voice should be almost inaudible, though careful observance of the articulation should ensure that the flow of tension is always maintained. This applies even when the harpsichord is playing at a dynamic level which may render the voice completely inaudible. The lack of interaction between the two performers is intended

Breathy sound (pitch scarcely audible)

Quasi parlando; some admixture of breath sound

In Song 9, all consonants and vowels should be separated. The first vocal section presents only consonants, and every effort must be made to avoid colouring these with vowels. Each consonant should abut the next with no transition, giving a percussive effect which will sometimes merge with the hard, dry sound of the claves

The voice and harpsichord may be amplified slightly to enhance their effect. The amplification must be carefully regulated, however, to avoid the emergence of any characteristic sonorities associated with amplification

This musical score is for a scene from Wagner's opera 'Die Meistersinger von Nürnberg'. It features three staves: Oboe, Cello, and Soprano. The Oboe part is marked with 'appena vibrato' and 'sempre sim.' (sempre sostenuto). The Cello part includes 'al. tall.' (all. molto) and 'arco' (arco). The Soprano part is marked with 'non cresc.' and 'sim.' (sempre sostenuto). The lyrics are in German: 'Die... se... lan... gen... Re... gen... fä... den...'. The score includes various musical notations such as dynamics (sfz, pp, mf, fff, cresc.), articulation (accents, slurs), and performance instructions (vibrato, sostenuto, arco, pizzicato).

The image shows a musical score for three instruments: Cello, Soprano (Sop.), and Harpsichord (Hpsd). The Cello part is written in a single staff with a treble clef and a key signature of one sharp (F#). It includes various performance instructions such as "vibr.", "non rall.", and "molto", along with dynamic markings like *p*, *f*, *mp*, and *mf*. The Soprano part is written in a single staff with a treble clef and a key signature of one sharp, and it consists of several measures of rests. The Harpsichord part is written in two staves, both with treble clefs and a key signature of one sharp. It includes performance instructions like "non rall." and "molto", and dynamic markings like *p*, *f*, *mp*, and *mf*. The score is for a piece in G major, 3/4 time, with a key signature of one sharp and a common time signature.
