- 2) Each note is preceded by an accidental, except in case(s) of an immediate repetition of pitch or a pattern of pitches.
- 3) All *glissandi* occupy the total duration of the note to which they are affixed. The *portamento* effect (a "delayed *glissando*") is always specifically indicated in the score.
- 4) The metronome indications are approximate and may vary slightly, depending on the acoustics of the hall.
- 5) All whispered sounds must project! The soprano and instrumentalists may slightly voice the whispered passages if the acoustics of the hall require this.
- 6) All harp harmonics are notated at actual pitch.
S. tav. = sulla tavola; m.o. = modo ordinario.

= a quarter tone lower than written pitch

8) The four books of Lorca *Madrigals* may be performed:

- a) as separate works (Books I, II, and III are perhaps most suitable for performance as self-contained works);
- b) as a larger cycle in which the four books are played in sequence (the approximate duration for the entire cycle, including pauses, is 35 minutes).

If *Madrigals, Book III* is performed separately, the following stage positioning is recommended:

If the *Madrigals* are performed as a cycle, the following diagram will show the most practical arrangement for the singer and instrumentalists:

- N.B. a) The harpist and flautist remain stationary throughout.
 b) The percussionist alternates between two positions.
 c) The contrabassist moves aside after playing Book I and takes a new position for Book IV.
 d) The soprano has a different position for each book of *Madrigals* (stands should be placed at these various positions).
 e) The placement of percussion instruments not shown in the diagram is left to the discretion of the performer.

9) For a performance of the entire *Madrigal* cycle (Books I-IV) the following percussion instruments are required (numerals within parentheses indicate the specific book in which the instrument is used):

Vibraphone (I, III)

Antique cymbals [Crotales] (II)

Glockenspiel (II, IV)

Two timpani (II)

Marimba (II, IV)

Bongo drums (III)

3 Timbales [high, medium, low] (III)

Very small triangle, suspended (III)

2 suspended cymbals [one small, one large] (IV)

Glass chimes (IV)

Tubular bells (IV)

and

N.B. In addition to the standard set of tubular bells, a low B-flat bell would be desirable. If the low B-flat is not available, however, this pitch may be taken an octave higher (see *Madrigals, Book IV*, footnote on page 7).
